

# Adhora

## Short Day Yellow Sweet Onion

### Short Day Yellow Sweet Onion

Adhora, previously trialed as NUN 1011, is a sweet short-day yellow onion with a maturity of 155-160 days. This variety produces a deep Granex-shaped bulb, a sweet flavor profile and a golden straw color. It also has excellent bolting tolerance and a high percentage of single centers.

This addition compliments our current yellow portfolio, expanding our range of maturity while offering excellent size, quality, color and yield potential. Our yellow portfolio begins with Vidora as the earliest yellow maturity, Adhora as next in maturity, then Plethora as main maturity.

#### VARIETY CHARACTERISTICS

Maturity	155-160 Days
Bulb Size	Large - Jumbo
Skin Color	Golden Straw
Storage Months	Good Storability
Bolting Tolerance	High
Percent of Single Centers	High
Disease Resistances	High – Foliar & Pink Root

Shape & Size Uniformity

High Yield Potential

Great Flavor

Excellent Color and Skin Quality
