

Isidea

Short Day White Onion

Short Day White Onion

Isidea, previously trialed as NUN 2006, is a short-day white variety that thrives during the early to main season, maturing in just 150-155 days. This variety boasts a uniform, round Grano-shaped bulb with a bright color. It has a high bolting tolerance, and its tops are notably strong and healthy. It has a high tolerance to greening.

This addition compliments our current white portfolio, expanding our range of maturity while maintaining excellent foliar and root disease resistance. Our white portfolio begins with Althea as the earliest white in the market, Isidea as early maturity, Amadea as early/main maturity, Carta Blanca as main maturity, and Florentina as late maturity.

VARIETY CHARACTERISTICS

Maturity	150-155 Days
Bulb Size	Large - Jumbo
Skin Color	Bright White
Bolting Tolerance	High
Disease Resistances	High – Foliar & Pink Root

Shape & Size Uniformity

High Adaptability

High Yield Potential

Bright Color and High Tolerance to Greening
