

Summak

Sweet Pepper

Sweet Pepper

This hybrid has excellent performance in warm conditions due to its heat resistance and plant balance, making it perfect for low-tech production systems such as shade houses. It has a long harvest window, and is grown in the autumn/summer/spring.

VARIETY CHARACTERISTICS

Grow Type	Shade house
Maturity	Early
Size	Average Length (cm): 8 Average Diameter (cm): 3.5 Average Weight (g): 47
Earliness	9
Vigor	6
Shape	Mini conical red
Disease Resistance	HR: Tm:0

Consistent fruit quality

Intermediate vigor

Sweet taste

RESISTANCE KEY: Tm: 0: Tobamovirus Group 0

LEGEND: 1: Long growing period, 9: Short growing period; 1: low vigor 9: high vigor;

Information provided is based on experience with tests, trials, or practices as well as general observations over multiple years.

Individual results may vary. Nunhems USA, Inc. ("Nunhems") strives to provide accurate and complete information, descriptions, content, illustrations, images, and data ("Information") on its websites, social media sites/posts, and printed materials ("Publications") as such Information is reasonably available to Nunhems at time of compilation. When the Information is based on experiences with tests, trials, or practices, such Information is provided by Nunhems as closely as commercially possible to such experiences. Information may also be based on general observations. However, Nunhems cannot guarantee the Information in any form whatsoever; therefore, the Information is provided on an 'AS IS' basis and without any guarantee, either express or implied, including, without limitation, that the Information is accurate or complete. Under no circumstances is the Information to be considered as advice or as a recommendation. Buyer is solely responsible for seed selection and purchasing decisions, including whether to rely upon the Information and for determining suitability of the seed for the intended growth and use under buyer's local conditions.

The Publications are intended to help buyer identify plant diseases that may or could affect his/her crops. The images may give a distorted image of reality and may otherwise not be an accurate portrayal of the disease.
