Advice

This is a vigorous variety with big leaves that doesn't abort. I will go thru tough conditions easily. There is an overload of power, think in possibilities. You can think of removing leaves from the top to open the crop and get more speed on the fruits. You can also think of topped plants, you will start more generative with longer fruits.

Resistance Key

Cca: *Corynespora cassiicola*
Ccu: *Cladosporium cucumerinum*
CGMMV: Cucumber Green Mottle Mosaic Virus
PM: Powdery Mildew
